

Letters From Our Clients

October 14, 2009

Byron,

Thank you for the informative session at our ASHI Wiregrass chapter meeting last evening. The truss information was excellent.

I advise people to consult with a structural engineer on occasion, but have never been able to give a name or number that I felt comfortable with. I will be sure to pass your information along as needed. Also, I like the idea that I can send you an email with a photo to get an opinion...would be a big help in many cases.

If you have time, could you forward that PowerPoint presentation, please?

Sincerely,

Todd Johnson, CPI

Dear Byron:

Just a note to say a very special "Thank You" for your attentiveness to our recent struggle with a sink hole at our home.

You were called into a situation what had gone bad from the original engineering company.

Our personal safety and the structural safety of our home was your first concern.

You were promptly on the scene when you said you would be here. You also had a great working relationship with the Geologist and the company doing the grouting.

We appreciate you being on the scene several times checking on the progress. Your professionalism was outstanding.

Again, thank you!!!

Sincerely,

Edward F. Nelson

Lutz, FL 33549

Ms. Munzer:

I just wanted to take a moment to thank you for the business relationship we have developed and to express how pleased I am with the quality and professionalism presented by SEI.

Your office personnel are quick to respond to our requests and scheduling for inspections and monitoring. In addition, their handling of difficult and challenging clients has been exceptional.

Byron Anderson is very detailed when inspecting a structure and always comes up with real world solutions to assist our clients. He goes the extra mile in discussing details with these clients; answering all of their questions and putting their minds at ease.

When I recommend SEI for a job, I know they will out perform the competition in quality and workmanship.

Thank you for your continued assistance and I look forward to working with you again on future projects.

Best Regards:

Keith R. Jason
Vice President of Sales

Dear Jennifer,

Just a quick note to let you know that I have been very happy with the services that SEI provides.

I first started using SEI for structural inspections related to structural fires. I recently started using SEI for ground subsidence related damage. I was a little apprehensive in the beginning, but the resulting work your firm has submitted has put me at ease.

It is nice to know that I do not have to worry about whether an assignment will be handled properly. Both Byron and Tom are very prompt to inspect the property and I cannot remember receiving any complaints in regards to their professionalism or demeanor.

Your office is very good about returning calls and answering questions. Your reports are completed in a very timely manner. If I have any questions regarding the report, Byron and Tom are always available for discussion and further explanation.

I would definitely recommend your firm to anyone needing a structural engineer.

Sincerely,

Conrad Caringal

Byron:

I wanted to take this opportunity to thank you and all of your employees for your efforts in helping myself and Kimball Hill Homes out while I was employed with them as Head of Purchasing. Before we started doing business with SEI, our structural plans were vague, difficult to perform accurate take offs, hard to construct from, and were held up in permitting. You and your team were able to successfully turn this problem around and allow us to get back on track with permitting and purchasing in Pasco, Hillsborough, Manatee, Sarasota, Lee and Collier Counties.

You and your organization are highly professional and a pleasure to work with. As I move on in my career (no longer being employed with Kimball Hill Homes) one of the things I will miss most is the business and professional relationship we have developed working together as a team. I hope that we have the opportunity to work together in the future.

As Always,

Rick Roberts

April 12, 2006

Byron,

I want to thank you so very much for taking time to come to my home and review my water problem. You were very kind to do such a professional job. It is a shame that my options are so limited, but I feel comfortable that you agree with my problem solving steps. I will be finished with the french drain tomorrow and next week I'm beginning to put up the gutters. After that, I'll do as you suggested and wait and see! Once again, thank you so much for your kindness. If ever I can reciprocate please let me know. All the best to you and your entire organization.

September 30, 2005

Dear Byron,

I wanted you to know how much we appreciate all the work Cheryl has done to ensure our ability to get out all the permits for this month. I had 70 permits for Palma Sola Trace and 7 for Founders Club. There were more permits for Linda as well. We would not have been able to do it with out SEI's assistance.

Thank you for being great team players!! Linda and I enjoy working with Cheryl. We wanted to acknowledge our appreciation to all those behind the scenes that made it happen.

Sincerely,
Regina Abbott
Construction Coordinator
